

The Jonard 9" Torpedo Level features a durable aluminum frame with a protective plastic housing for reliable performance. The LEVT-9 is designed for accurate alignment in electrical, low-voltage, and general construction applications.

- 9" torpedo-style level with tapered ends for easy positioning in tight or confined spaces.
- Three high visibility, easy-to-read vials at 0°, 45°, and 90° with a top window for quick viewing from any angle.
- Magnetic strip on the bottom securely attaches to metal surfaces for hands-free operation.
- Integrated V-groove helps stabilize the level on conduit, pipe, and other rounded surfaces.
- Bright blue textured plastic housing improves jobsite visibility while protecting the aluminum frame from impact.
- Two integrated tether holes for secure use when working at height or convenient storage.

SPECIFICATIONS	
TYPE	Torpedo
# OF VIALS	3 angles: 0°, 45°, 90°
LENGTH	9"
ADDITIONAL FEATURES	V-Groove, Magnetic Bottom, Tether Holes
MATERIAL	Aluminum with Plastic Housing
DIMENSIONS	N/A
WEIGHT	N/A
UPC #	810215350438
